FACT SHEET: ARE YOUR TREASURY AND TRADING SOLUTIONS SCALABLE, SECURE AND COMPLIANT?

Wallstreet ASP – empowering your treasury and trading functions with compliance, security and global accessibility

The Wall Street Systems Application Service Provider (ASP) delivery model enables banks and corporations of all sizes to reduce capital expense, implementation and maintenance costs. When using a system delivered via ASP, Wall Street Systems (Wallstreet) owns and provides all required infrastructure required to run your treasury or trading system. You have access to a market-leading, robust system without the dependency on internal IT support.

Wallstreet's solutions are all deliverable via ASP architecture. They are scalable and secure. They meet challenges associated with software license fees and capital expense, project risk, hardware and IT costs, maintenance, upgrades, disaster recovery, security, compliance and training.

Wall Street Systems has over 350 of the world's leading banks and corporations as its clients, and has been delivering ASP solutions since 2006. The Wallstreet ASP delivery model has proven itself time and time again to deliver the cost savings, reduced project risk and the security that our clients require.

“The whole in-house project was delivered in six months, on budget and on time, and with not a consultant in sight. ASP, notes Paterson, ensured that the implementation process was ‘a lot easier and quicker’ than if the system had been installed in-house.”

James Paterson,
Group Treasurer, Mondi
Corporate Financial Systems,
April 2009

BUSINESS BENEFITS

- Lower total cost of ownership
- No capital expenditures
- Rapid deployment
- 24x7x365 monitoring and systems management
- Fault tolerant (no single point of failure)
- Robust security
- Training and Professional Services bundles.

- **Managed services**

WALLSTREET ASP SOLUTIONS DELIVER:

- SAS 70 Type II certified data centre and operations management
- Web-based CRM system for problem and issue submission and tracking
- Complete redundancy on all systems providing a highly available environment
- Backup services
- Problem detection and resolution
- System upgrades
- Test environments
- Optional services: dedicated hardware, disaster recovery infrastructure, dedicated network connections.

WALLSTREET ASP FEATURES

CLASS A DATA CENTRE(S)

All systems are housed in a state-of-the-art Class A/Tier 1 data centre with complete 24x7 operations monitoring and management.

SAS 70 TYPE II CERTIFIED

All system operations and management have been fully audited.

REDUNDANCY

All servers are redundant, and thus no single point of failure exists anywhere in the environment.

SECURE ENVIRONMENT

Encryption, firewalls, dedicated VLANS, intrusion detection and ethical hacking insure that the entire solution is secure.

DISASTER RECOVERY

All solutions are highly available and have optional disaster recovery components in alternate data centres with full database replication to ensure business continuity in the unlikely event of a site failure.

CONNECTIVITY OPTIONS

- Dedicated circuits (T1, etc.)
- VPN
- Internet.

INTERFACING

- Market data feeds
- Connections for Reuters, EBS and other electronic dealing interfaces
- Other interface needs for downstream systems, reporting and data extracts.

“One of the largest, Procter and Gamble, recently moved the whole of its treasury operations from a Wall Street Systems in-house installation, which was fully integrated with its ERP systems around the world carrying out \$1 trillion worth of transactions a year, to the Wall Street Systems ASP solution, a move which has proved extremely successful.”
